

## Elmfield Nursery Gosforth

As part of the Newcastle City Council Quality and Access Schemes, Northern Construction Solutions were contracted for the demolition of an existing single storey store adjacent to the main nursery building and the erection of a single storey extension providing a new laundry and playroom. The site which was located in a residential area and fronted by a public footpath needed strict health and safety guidelines.

A traffic management system and arrangements for the delivery and removal of materials were put in place to ensure minimal disruption to the public and surrounding residents, this included protection/barriers and warning notices. Northern Construction Solutions took special account of the additional requirements involving local residents and children.

The project was completed on time, within budget, with no safety incidents and to the satisfaction of the Client and end users.

Client	Newcastle City Council
Value	£86,000
Duration	weeks
