

Shildon Civic Hall Extension and Refurbishment

This project involved the refurbishment of the existing Civic Hall.

The works were carried out in 3 phases to enable the hall to remain operational. A close liaison was required with the hall management team to ensure that works were carried out with minimal disruption whilst ensuring the safety of the general public and staff.

The works included the provision of new roof structures and roof coverings, new entrance area and toilets, replacement and reconfiguration of the bar area, asbestos removal, M&E works, decoration, external rendering and external works.

By working closely with the Client and his professional team to fully understand the projects inherent challenges and the budgetary constraints, Northern Construction Solutions were able to assist in value engineering the project to produce an appropriate scope of works and then successfully deliver a high quality project, on time, within an agreed budget and without any safety incidents.

Client	Shildon Town Council
Value	£420,000
Duration	19 Weeks
