

Waterworld Development Prudhoe

This project comprised of demolition and construction of a new entrance lobby, a new 160m² studio room and the refurbishment of an existing gym into three fitness suites. All works were completed in a 'live' working environment within the existing leisure centre and with close liaison between the Leisure Centre managers and our own site management team.

The works were carried out with minimal disruption to the day to day activities of the existing leisure centre due to regular Client/Contractor co-ordination meetings, where works were planned to avoid busy periods for the leisure centre and to assist in the management of Health and Safety for placing of concrete and lifting of structural steelwork. In addition, mechanical and electrical services were installed throughout the existing building during night shifts and weekends.

The project was completed safely, to a high standard of quality, on time and within the Client's tight budget constraints.

Client	Tynedale Council / North Country Leisure
Value	£370,000
Duration	26 Weeks
